The temporary manual valve
selected for testing of an
automated gas environment
system had an integral burst
disk rated at 1900 psi +/-
100 psi. This is an unusual
valve configuration, typically
used for cryogenic service.
The valve was an on-hand
spare, but the
documentation of the burst
disk feature was not

available.

Clinical Chemistry

Clinical chemistry uses many different methodologies, manual and fully automated tests, examines both very common and esoteric analytes, mixes basic chemistry with biochemistry, engineering, informatics and

other disciplines, and overlaps with other areas of concentration, in particular, toxicology and endocrinology.

Chemistry for High School

the sciences. The honors course will also fulfill a lab science credit for graduation.) Standard - The plans in this option are for a standard lab science, 1-credit High School Chemistry course. There are textbook assignments, experiments or online labs, and written work with these plans. Expect to take about 4 to 5 hours a week to complete these

Introduction Causes of an Elevated Creatine Kinase
